A BOTTLE FOR LIFE

Take a tanka!

“2005, Nelson, New Zealand”

HOW IT ALL BEGAN ...

ECOtanka was born from a passion for health and the environment, founded in New Zealand, in order to provide the need for **just one bottle** that would last a lifetime and keep drinks cool and fresh all day.

Failed after a couple of years of trying to find a good safe bottle, Aaron Broderick, the founder, had no choice but to start manufacturing his own pure stainless steel bottles. In 2005, the first 1,000 bottles were made and they were so clean and fresh to drink from. Hence the brand of “ECOtanka” was created.

Before long ECOtanka started to get enquiries from all over the world and took off.

After one and a half decades since then, more plastic wastes are being found in our lands, seas and everywhere than ever, which could be the biggest threat to our environment and the future of our children. Micro-plastic particles are getting into our drinking water and even the air we breathe in. Healthy and environmentally-conscious drinking and eating is our concern, we invite you to participate.

Join us!

thermoTANKA

The double-walled vacuum insulating thermoTANKA bottles are perfect for all climates both cold and hot, most indoor and outdoor activities where it matters to keep your drink nicely hot or refreshingly cold for a long time. Our thermoTANKA comes in five different sizes.

LID DIVERSITY

Choose the lid that best suits your needs.

#thermotanka

VERSATILITY

The ECOtanka double wall vacuum bottles are made with two layers of pure stainless steel with a vacuum created in between the layers to keep your drink hot or cold in any temperature.

All of our single wall bottle lids also fit the thermoTANKA range for convenience and multifunctionality.

Choose your preferred size for your activity:

- 350ml thermoTANKA
- 600ml thermoTANKA
- 800ml thermoTANKA
- 1200ml thermoTANKA
- 2000ml thermoTANKA

thermoTANKA

The uses for the 350ml thermoTANKA is endless! This great little bottle with double wall vacuum insulated design keeps your drink hot or cold until you are ready. The compact small-sized is popular & useful among all ages. Perfect to keep milk warm for that extra baby feed or cold for your hot drink when out and about.
